QUALITY WORKMANSHIP

Elaborate Floors installs all types of overlaid flooring products across New Zealand. We work with you or your company with our full admin service, planning in advance. During the installation we provide a comprehensive on site quality controlled package to ensure that all floors are installed to manufacturers specification and according to the clients expectation. It is important to us that our clients are left happy and willing to give a good job reference in the future.

With our hassle-free, no questions asked, resolutions policy we seek to ensure that all installs have little or no headaches for our clients. We stand by our workmanship and guarantee a quality installed product for competitive rates.

SOLID TIMBER

Elaborate Floors have years of experience in the laying of solid timber flooring.

We have an extensive understanding in both the technical specification and installation of solid timber and bamboo flooring. We can lay any type of flooring from your favourite American oak right through to exotic hardwood herringbone parquets. We take pride in our finished floors!

BAMBOO FLOORS

It is very important that bamboo flooring is installed correctly by a specialist.

Bamboo has a high dimensional variance. This means bamboo flooring expands and contracts more than most other flooring types due to its composite nature. Therefore correct allowance needs to be made when this product is laid. Needless to say, bamboo flooring is a great choice and a great product to sell.

ENGINEERED FLOORING

LAMINATE FLOORING

EFFICIENT | FLEXIBLE

There is not another scenario more variable and pressured than The Block NZ. We featured and installed all the hard flooring for each contestant in 2015 and 3 of the 4 teams in 2016. This industry requires a company that can improvise and make anything work in a very efficient manner.

When time is short and clients have strict deadlines, we can flex our resource to lay over 80m2 of flooring in one day like we did here at the ASB Marquet in Auckland at the start of 2016 for the tennis open.

STAIRWAY SYSTEMS

Every brand of flooring has their own various systems when it comes to stairs. We are very experienced in working with stair systems of all types. We can work in with the end user to come up with a system that works for them or we can simply follow all design parameters set out by the architects. We have installed stairs in Vinyl plank, bamboo, laminate, and solid timber. We are happy to run training sessions on these systems to ensure everyone is confident in the sales of stair systems.

VINYL PLANKS (LVT)

We lay all types of vinyl planks and can work with both acrylic and epoxy glues when a glue down option is required.

We have worked with most systems on the market in NZ and are confident to deliver a finished result which pleases the end user.
